- Packed in full-color box

050802

It is a hig high quality Glockenspiel with a good price.
This Glockenspiel has a simple but sturdy and reasonable structure.

- Size: approx. 215 x 100 x 32 mm (L x W x H)

050803

This instrument has a unique feature absent on a standard Glockenspiel: a sound board – which you can actually hear!
We've never before encountered a Glockenspiel this size with such a clear and powerful sound.

- Size: approx. 225 x 100 x 45 mm (L x W x H)

NEW!

050807

- Size: approx. 225 x 108 x 35 mm (L x W x H)
- Made of beechwood

050808

High-quality instrument, ideal for pre-school music education.
This Glockenspiel is a real feast for the eyes: 8 high-quality colored metal bars resting on a gently rounded beechwood bridge, smoothly rounded edges and a gentle wax treatment make it really easy on small hands.

- Size: approx. 300 x 115 x 50 mm (L x W x H)
- Made of beechwood

050820

NEW!

Fish design features a resonator chamber which enhances bar sustain.
Eight precision tuned bars arranged in a C major scale provides an authentic musical experience and a pleasing soundscape.
Easy to play flat or vertical.

- Size: approx. 305 x 145 x 35 mm (L x W x H)
- Made of solid pinewood

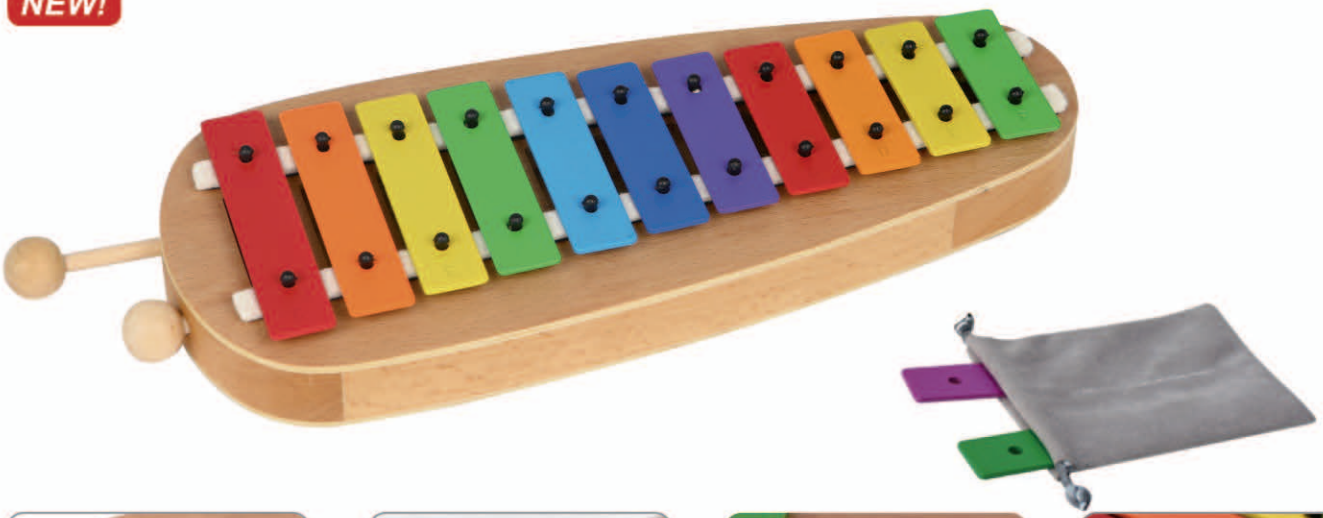

050829

11 TONES KINDER GLOCKENSPIEL

The perfect early music education choice!
There's a unique design feature distinguishing this Glockenspiel from its many siblings: accurately positioned resonance holes below each bar, creating a full and harmonious sound and enchanting small musicians from the first note. With its harmonically rounded child-friendly and safe design this Glockenspiel is the ideal toddler's companion and your perfect choice for early music education.
Due to its range (C6-F7) even melodies with a greater range are easily playable on this Glockenspiel, while simply changing a metal bar lets you tune your Glockenspiel to G major or F major, alternatively.
Use the integrated mallet mount to always keep your mallets close at hand, there is a cloth bag for storing the additional metal bars (F# and Bb).

- Size: approx. 325 x 125 x 38 mm (L x W x H)
- 13 colored bars with carving notes
- Metal bars made of special steel and size is 20 x 2 mm
- Fundamental tuning
- Pitch range from C6 to F7 (additional notes F#6 and Bb6)
- Tuneable to C major, G major or F major
- Excellent sound
- Exclusive paint process make the clear and powerful sound
- Patented design of Musicube
- Intricate rounded instrument body, specially optimized resonance holes
- Resonator made of solid beechwood and plywood
- Exclusive designed body with practical storage option for the mallets
- Wood surfaces are protected with water-based paint
- Musicube songbook with colored notes for easy learning
- 2 Wood mallets, song sheet & cloth bag included
- Great for school or home
- Packed in full-color box
- Soft bags can be purchased separately

13-TONES METALLOPHONES

The bars with the laser of the note enable a visual connection between the sheet music and the instrument. When improvising with self-created melodies, children always have a visual reference to the printed notation. From the other perspective, the players get a feeling of how a play note sounds. All Primary metallophones have 32 x 8 mm (Soprano and Alto) or 36 x 10 mm (Bass) sound bars with fundamental tuning. The newly designed resonator box with enhanced acoustics are made of solid and laminated birch. The resonator boxes of the Musicube metallophones are made from FSC" certified timber from well managed forests. In addition, all wood surfaces are protected with Water-based paint, an environmentally safe, all-natural varnish.
Each metallophone is equipped with a carrying bag to stow 3 bars (2 x f-sharp, 1 x b-flat).

- Metal bars made of special aluminum
- 16 metal bars with carving Notes, includes 2 x f# and 1 x Bb bars
- Fundamental tuning
- Tuneable to C major, G major or F major
- Sandblasting and anodizing treatment of aluminum bars make the clear and powerful sound
- Flexible pins
- Resonance box made of 12 mm birch plywood
- Multiple resonance chambers for a rich sound quality
- Resonator box are protected with water-based paint for lasting durability
- Handles for easy transportation
- The plastic mallets are made of rubber with different hardness (3 levels)
- Musicube songbook with colored keys for easy learning
- 2 plastic mallets, song sheet with coloured notes & clotht bag included
- Great for use in the classroom
- Packed in brown box

051301 SOPRANO METALOPHONES

13-TONES XYLOPHONES

Xylophones with hardwood Sound Bars
All the xylophones have 32 x 10 mm (Soprano and Alto) or 36 x 12 mm (Bass) sound bars with overtone or fundamental tuning. The bars printed with note names and staf positions, help the player connect the sound of the note with its notation, which is helpful when improvising or playing self-created melodies. From the other perspective the players get a feeling of how a play note sounds. The newly designed particularly stable resonator box with enhanced acoustics are made of solid and 12 mm laminated birch. The sound bars and resonator boxes of Musicube xylophones are made of FSC certified timber from well managed forests. In addition, all wood surfaces are protected with Water-based paint, an environmentally safe, all-natural varnish.
For professional music lessons, these instruments fulfill every need. High quality bars combined with complex resonance chambers in the alto and bass ranges always produce ample volume and rich, strong sound. The instruments in the bass range are extremely compact, space saving and easy to carry.
Each xylophone is equipped with a carrying bag to stow 3 bars (2 x f-sharp, 1 x b-flat).

- Metal bars made of bright rosswood
- 16 bars with carving notes, includes 2 x f# and 1 x Bb bars
- Fundamental tuning
- Tuneable to C major, G major or F major
- Exclusive paint process make the clear and powerful sound
- Flexible pins
- Resonance box made of 12 mm birch plywood
- Multiple resonance chambers for a rich sound quality
- Resonator box are protected with water-based paint for lasting durability
- Handles for easy transportation
- The plastic mallets are made of rubber with different hardness (3 levels)

DJEMBES DRUM

Resonator box is hollowed out by a whole real Indonesian mahogany, which make the vibration transmission inside the drum body is uniform, High hardness and high density body ensure sound quality. The drumhead is made of adult goatskin that has not been bleached, so the drum surface is not completely white and flawless, but the sound quality of the tap is better.
With good tensile strength and toughness, High-strength inelastic mountaineering lanyard can keep in tune for a long time.
The ethnic style painting is very beautiful, conveys enthusiasm and adds exoticism to the drum.

FOOT TAMBOURINE SET

6 Years +

This foot tambourine set have our special sound design. The red tambourine sounds soft and the black tambourine sounds heavy, which meet the player's creative needs, Use them together or separately for different accompaniments.The foot tambourine slips over your shoe so you can tap your foot to accent beats; It lets you easily add percussion while your hands are busy playing other instruments. Layering your music with new sounds gives your performance movement, especially if you're playing solo acoustic gigs on guitar or backing a band on a cajon.
The tambourine effect comes from its four pairs of stainless steel jingles that have bass-tone (red) and alto-tone (black), these are the same jingles used on some of our professional tambourines. It's easy for anyone to play, and you don't need any prior skill, you don't need exaggerated foot movements to get a solid sound; The jingles face forward to easily activate so you can play with comfort and accuracy wear over shoes, boots or heels; The elastic band slips on easily with a secure fit so it doesn't slide off or move out of place during your song.

- Size: approx. 125x 45 x 105 mm (L x W x H)

Clear and bright tone with a fast response are designed to produce a rich sound that starts quickly even with a small amount of air. The clear and bright tone quality speaks evenly across all the notes.
Stable tuning that lasts and lasts In addition to being fine-tuned and adjusted by specialists at the factory, the internal brass sound plates (aka reeds) are treated with a special corrosion-resistant coating that keeps the pitch clear and stable for many years.
Engineered to prevent leaks a seamless rubber seal encloses the air chamber and the valves to prevent leaks.
Smooth action keyboard every individual key has its own separate suspension spring with anti-vibration guides, giving the keyboard a very responsive and smooth feel.

183601

36" SOLID SPRUCE ACOUSTIC GUITAR

Good playability and professional sound!
Due to its solid spruce top our sounds just like you'd expect from a good steel string acoustic: strong but well-balanced. Whether your're boldly strumming or finger picking delicately, this guitar's open pore finish gives the solid spruce top room to 'breathe' and vibrate freely, ensuring good projection and an even frequency response. A good action and a nut width of 43 mm give you optimum playability, fingerboard markers help you find your way around the neck and a beautiful pickguard protects the top of your guitar when playing with a pick. Closed chromed machine heads ensure excellent tuning stability, while fingerboard markers help you find your way around the neck easy and fast.

- Size overall (approx.): 930 x 363 x 105 mm (L x W x H)
- The guitar is made of the following materials:

-Ceiling: Solid spruce
-Frame and back: Tinted reddish brown catalpa plywood
-Neck: Solid mahogany
-Fingerboard and bridge: Engineered wood
-Close type machine head
-Ribbons: Nickel silver, side waistband marking
-String material type: Alloy steel

- Paint: Matte finish
- Scale length: 603 mm
- 43 mm saddle width
